

NTREIS MLS Integration

Why integrate the MLS on my website when I can access it from ntreis.com?

THUMMAS CORPORATION

Benefits

What are the benefits in using MLS technology on your site?

Don't leave your own site anymore to search the MLS

The NTREIS MLS search feature can be fully integrated into your custom website with the same look and feel

Allow your clients to search the MLS in pursuit of their dream home

Automatic emails can be sent to your clients when a home that fits their criteria enters the market

Let your clients save images of homes that they love with an id and password

When searching for a dream home, people want to know all their options. Any real estate agent in Dallas should have this feature on his or her website to maximize the buying possibilities for the most important people involved in the process – the client! The basic MLS Integration includes 10 areas in the metroplex and areas can be added for small upgrade fees.
